Dear Sir/Madam

The development of approximately 6km of the Norwich Western Link Road connecting the A1067 (Fakenham Road) with the new A47 North Tuddenham to Easton scheme (being developed by National Highways), including the construction of a new roundabout junction with the A1067 Fakenham Road, improvements to the A1067 Fakenham Road and the roundabout junction with the A1270 Broadland Northway.

The construction of this link road will improve the speed and ability of the emergency services to be able to respond to emergency situations or incidents across large areas of Norfolk. The link road will reduce the need for large response vehicle to navigate narrow and difficult to access routes especially within the localised area.

Regards
