1 Introduction

1.1 Table F-1 - Core and peripheral foraging areas for radio-tagged bats in 2021

- 1.1.1 Table F-1 shows the core and peripheral foraging areas for radio-tagged bats in 2021. From left to right, the first column details the key areas (locations) of foraging, second column is for grid references. Columns three to six are for barbastelle, brown long-eared bat, Daubenton's bat and Natterer's bat, under which in the rows and corresponding with the key areas (locations), either a C (for Core) or P (for Peripheral) is input.
- 1.1.2 An asterisk for brown-long eared bat, Daubenton's bat and Natterer's bat denotes that the core and peripheral foraging areas are based on a very limited number of tagged bats.
- 1.1.3 We have included a summary of key information shown in this document in an accessible format. However, some users may not be able to access all technical details. If you require this document in a more accessible format, please contact norwichwesternlink@norfolk.gov.uk.
